Director's Report:

Mr. Martin updated the Council on the following:

- **Housing Program:**
Mr. Martin stated that all available County housing units are currently occupied.
- **Custodial Agreements:**
Mr. Martin's update noted that there has been no change in the status of custodial agreements.
- Mr. Martin stated that a Request for Proposal for the restoration of Homan House in Yaphank was sent out on April 14, 2014. Mr. Martin noted that the County has been working on the stabilization of the Homan House for a number of years and he would like to get additional funds this year so that restoration of the house can continue to move forward.
- Mr. Martin noted that a Request for Proposal for the Hubbard County Park Master Plan Request also has been sent out. Mr. Gibbons, who is working with Mr. Martin on the Master Plan, stated that Parks had an on-site meeting with the prospective consultants. Mr. Gibbons noted some of the very unique opportunities that exist at Hubbard County Park which will need to be considered as part of the Master Plan. The next step will be an assessment of the received proposals. Parks will update the CEQ after a consultant is selected.
- Mr. Martin also noted that the Yaphank Historic Society is receiving an Organizational Excellence award from the Society for the Preservation of Long Island Antiquities. The awards ceremony is on Sunday April 27, 2014 from 2 PM to 4 PM at the Topping Rose House 1 Bridgehampton-Sag Harbor Turnpike, Bridgehampton, NY.

Recommended Unlisted Actions:

- A.** Proposed Roadway, Safety and Capacity Improvements to CR13, Crooked Hill Road, Towns of Islip and Smithtown

Victor Keneiby, Project Manager, Suffolk County Department of Public Works and Rich Geiger, P.E. Bowne AE&T Group, gave a presentation regarding the proposed project. The project involves highway, drainage, traffic signalization and safety improvements to CR13, Crooked Hill Road, from the vicinity of CR106, Community College Drive, to the vicinity of the North Service Road of the Long Island Expressway, a total distance of approximately 1.4 miles. These improvements include pavement widening and realignment, full reconstruction of existing pavement, full curb installation on both sides of CR13, sidewalk installation along most portions of the corridor, and the installation of

new positive storm drainage systems. The realignment and widening of CR13 requires land acquisitions on both sides of CR13.

After much discussion regarding the details of the project it was determined by the CEQ that more information was required. Mr. Freleng, Chief Planner with the Suffolk County Department of Economic Development and Planning, offered a suggestion to do an expanded Part 3 on the Environmental Assessment Form (EAF) rather than recommending doing a full Environmental Impact Statement. The CEQ agreed with Mr. Freleng and the CEQ decided to table the project so that an expanded EAF Part 3 section could be completed. The CEQ stated that the following additional information should be included in the expanded Part 3 section of the EAF:

- Information regarding Suffolk County's Complete Streets adopted policy and its applicability to this project.
- Additional information on the possibility of adding a bike lane to the proposed project. This information should include but not be limited to information on the project right-of-way dimensions, constraints, and required acquisitions.
- Information on whether bike lanes are planned for the Heartland Town Square Project.

Mr. Kaufman made a motion to Table the proposed project pending the preparation of an expanded EAF Part 3. Ms. Growney seconded the motion. Motion passed.

Recommendations for LADS Report:

A. Recommendations for Legislative Resolutions Laid on the Table March 18, 2014

Mr. Corral noted that the staff's SEQRA recommendations are listed on the LADS report. Mr. Corral also noted that IR 1294-2014 is the acquisition resolution for the Boyle Road property which the CEQ had recently reviewed.

Mr. Kaufman made a motion to accept staff recommendations as presented for the March 18, 2014 Legislative Resolutions. The motion was seconded by Ms. Growney. Motion carried.

CAC Concerns:

Ms. Squires requested a presentation on Suffolk County's "Complete Streets" Legislation at the next CEQ meeting.

Ms. Spencer requested that the May 21st CEQ meeting be held at the Smithers Property in Hubbard County Park. Legislator Hahn requested changing the meeting time to 10 a.m. All CEQ members agreed to the location and time change for the May meeting.

Instructions: Part 1 is to be completed by the applicant or project sponsor. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information. If a question is not applicable to the proposed project indicate with “N/A”.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either “Yes” or “No”. If the answer is “Yes”, complete the sub-questions that follow. If the answer to the initial question is “No”, proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

Name of Action/Project: Roadway, Safety and Capacity Improvements to CR13, Crooked Hill Road
Project Location (specify Town, Village, Hamlet and attach general location map*): from vicinity of the North Service Road of the LIE to the intersection of CR13 with CR106/Community College Drive
Street Address: CR13 Crooked Hill Road
Name of Property or Waterway: N/A

Type of Project: New Expansion

Capital Program: CFA#2432 Item # Date Adopted: August 1, 2012 Amount: \$2,500,000.00

<p>Brief Description of Proposed Action (include purpose or need/attach relevant design reports, plans, etc.):</p> <ul style="list-style-type: none"> - This project will provide highway, drainage, traffic signalization and safety improvements to CR13, Crooked Hill Road, from the vicinity of CR106, Community College Drive to the vicinity of the north service road of the L.I.E., a total distance of approximately 1.4 miles. - Improvements will include pavement widening and realignment, full reconstruction of existing pavement, full curb installation on both sides of CR13, sidewalk installation in most areas. Road pavement cross slopes and longitudinal grade rates will meet Suffolk County requirements. Installation of a new positive storm drainage system north of the Sagtikos Parkway overpass will be provided. This system will be connected to an existing New York State recharge basin No. 99. - South of the SAG overpass, another positive system will be proposed to be connected to a County drainage system that discharges into a Town of Islip recharge basin. - Typically, CR13 will be designed as a four lane road (two through lanes in each direction), plus a shared center turn lane. In addition, a second left turn lane and a right turn lane will be provided at the larger intersections. The new roadway sections will provide added vehicular and pedestrian safety. - The project will also include new traffic signalization at all intersections due to the mentioned realignments, widening, and additional turn lanes. All existing traffic signage will be replaced. - The realignment and widening of CR13 has necessitated acquisitions on both sides of the road. All acquisition maps have been completed and presented to Suffolk County. - The proposed storm drainage systems will likely necessitate offsetting of existing underground utilities. All efforts will be made to minimize the number of conflicts. The relocation and/or replacement of utility poles may be necessary. - During construction, all required erosion and sediment control devices will be installed in accordance with NYS Erosion and Sediment Control Guidelines. These controls will be installed prior to soil disturbance and will be monitored and maintained throughout construction.

State Environmental Quality Review

Part 2 – Identification of Potential Project Impacts

Instructions: Part 2 is to be completed by the lead agency. It is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency’s reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “YES” to a numbered question, please complete all the questions that follow in that section.
- If you answer “NO” to a numbered question, move on to the next numbered section.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action.”
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

SUFFOLK COUNTY
FULL ENVIRONMENTAL ASSESSMENT FORM
6 NYCRR Part 617
State Environmental Quality Review

**Part 3 – Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- * Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- * Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- * The assessment should take into consideration any design element or project changes.
- * Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- * Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- * For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- * Attach additional sheets, as needed.

**Determination of Significance
Type 1 and Unlisted Actions**

SEQR Status: Type I Unlisted

Identify portions of EAF completed for this project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information and considering both the magnitude and importance of each identified potential impact, it is the conclusion of _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

RE: CEQ Review of the Recommended SEQRA Classifications of Legislative Resolutions
Laid on the Table March 18, 2014

At its April 16, 2014 meeting, the CEQ reviewed the above referenced matter. Pursuant to Chapter 450 of the Suffolk County Code, and based on the information received, the Council recommends to the Suffolk County Legislature and County Executive in CEQ Resolution No. 17-2014, a copy of which is attached, that the enclosed list of legislative resolutions laid on the table March 18, 2014, be classified pursuant to SEQRA as so indicated in the left hand margin. The majority of the proposed resolutions are Type II actions pursuant to the appropriate section of Title 6 NYCRR Part 617.5, with no further environmental review necessary. Unlisted and Type I actions require that the initiating unit of County government prepare an Environmental Assessment Form (EAF) or other SEQRA documentation and submit it to the CEQ for further SEQRA review and recommendations.

Enclosed for your information is a copy of CEQ Resolution No. 19-2014 setting forth the Council's recommendations along with the associated list of legislative resolutions. If the Council can be of further help in this matter, please let us know.
